

WP SURVIVAL BLANKET- BLEND DON'T BLOCK

AMETRINE. TECHNOLOGIES TO BE INVISIBLE

SALES@AMETRINE-TECH.COM

DESIGNED IN CLOSE COOPERATION WITH SOF FOR MAN-ON-THE-MOVE OPERATIONS, AMETRINE'S STEALTH WP (WATERPROOF) SURVIVAL BLANKET COMBINES THE ART OF CAMOUFLAGE WITH THE SCIENCE OF MULTISPECTRAL SIGNATURE MANAGEMENT (MSSM) TO MEET OPERATOR NEEDS. COMPACTLY PACKED AND QUICKLY DEPLOYED TO OFFER MAXIMUM CONCEALMENT WHILE MAINTAINING OPERATIONAL COMFORT AND EFFICIENCY. AMETRINE'S WP SURVIVAL BLANKET HAS BECOME AN ESSENTIAL PART OF THE OPERATOR'S TOOLKIT.

The WP Survival Blanket is a stealth concealment system engineered for operators who require total light discipline and signature control in rain conditions. Built on Ametrine’s Survival Blanket architecture and field-proven blackout fabric technology, the solution provides a reliable barrier against both detection and exposure. Designed for multispectral signature management (MSSM) across UV, VIS, NIR, SWIR, MWIR, LWIR, and RADAR, it suppresses visual, thermal, and light emissions while maintaining natural environmental blending.

Its dual-sided construction combines a fully black, light-blocking inner surface with a terrain-matched outer camouflage optimized for full-spectrum concealment. The blackout layer enables operators to safely operate illuminated devices, such as screens, optics, or electronic systems, without revealing their position, while also serving as a rainproof cover for observation posts or firing positions.

Versatile, durable, and weather-secure, the WP Survival Blanket adapts instantly from wearable cover to static hide or blackout enclosure. Compact, robust, and mission-ready, it deploys fast, conceals intelligently, and sustains complete stealth when light control is critical.

OPERATIONAL FEATURES:

- UAV's \ Drone Threat** - Minimizes aerial detection by reducing visual and thermal signature.
- Blackout** - Prevents light emission for complete VIS & NIR concealment.
- Waterproof Protection** - Shields operator and equipment from rain and moisture.
- Observation Post Cover** - Can provide overhead and frontal concealment for static hides
- Rapid Wear-to-Sheet Conversion** - Shifts from garment to concealment sheet in seconds
- Single-Operator Deployment**- Enables full setup, adjustment and recovery solo.
- Dual-Sided Construction** - Black interior and outer camouflage for multispectral blending.
- Light Discipline on the Move** - Enables rapid blackout of illuminated devices while repositioning.
- Signature Control** - Sculpts apparent shape to reduce recognition
- Directional Signature Screen**- Projects alternate terrain reflection to mislead sensors.
- Equipment Concealment** - Covers rifles, optics and compact systems effectively.
- Quick-Pull** - Presents concealment instantly against sudden threats.
- Long Duration Operations** - Maintains thermal balance for long static operations
- Directional Stealth Screen** - Forms a freestanding partition projecting alternate terrain signature
- Terrain Tie-Down Points** - Secures as a fixed concealment sheet on ground or vegetation.
- Multi-Purpose Utility** - Can cover personnel, static positions, or equipment
- Low-Noise Construction** – Prevents rustle and acoustic trace during movement.

SPECIFICATIONS:

- Weight: 1.2 kg
- VIS & NIR Emission Suppression
- Dual-layer fabric construction
- Wicking
- Waterproof
- Anti-Bacterial
- Low gloss finish to reduce glare and shine
- Eliminating UV radiation
- One size fits all
- Weatherproof for extreme conditions
- Electrostatic dissipation
- High abrasion durability
- Quick drying

Optional

- Snow kit
- 3D Foliage Layer
- Thermal Signaling Case
- Weapon wraps
- Gaiters / vest cover
- Pattern can be tailored upon request

Components

- 1X WP Multi-Purpose Tarp
